How to read this

- You want this team to win
- You want this team to lose
- Head-to-head with Notre Dame

"@" = on the road · % = their chance of winning (SP+)

Notre Dame's own row is shaded by each game's leverage on its own schedule; the Playoff column by playoff chance.

WHAT THE SHADING MEANS

Darker means the game matters more to Notre Dame: it weighs how much the result would move Notre Dame's playoff odds together with how likely that swing is, so a coin flip between two contenders shows up stronger than a near-certain blowout. A game can matter because the loser drops behind you in the rankings, because a conference title and its automatic bid change hands, or because a team on your schedule ends up with a better or worse record.

Every shade comes from playing out the rest of the season 30,000 times and flipping each game one at a time to see whether Notre Dame still makes the field.

- BIGGEST GAMES NOT INVOLVING NOTRE DAME
- Wk 5: Miami at Clemson — pull for **Miami**
 - Wk 12: Memphis at Navy — pull for **Navy**
 - Wk 10: BYU at Utah — pull for **BYU**
 - Wk 8: USC at Wisconsin — pull for **Wisconsin**
 - Wk 2: Arizona at BYU — pull for **BYU**
 - Wk 3: SMU at Louisville — pull for **SMU**

Field = ACC, Big Ten, Big 12 and SEC champions plus the highest-ranked Group of Six champion, then the seven highest-ranked teams remaining; straight seeding. Win probabilities from the SP+ rating gap with home advantage; final ordering is a strength-plus-résumé stand-in for the committee.
